

God Bless Mother Russia!!

Last updated on Sept. 1, 2008.

Russian President says unipolar world is unacceptable and dangerous!!

Only 3 nations in the entire history of the world came very close to global hegemony. They were: Imperial Spain, Nazi Germany, and the Pentagon controlled United States!!

One world governed by one dictator is Satan's dream come true . . . and a NIGHTMARE for the entire world....Thank God that Mother Russia is bringing this nightmare to an end for good:

"BOCHAROV RUCHEI (Sochi), August 31 ([Itar-Tass](#)) -- Russian President Dmitry Medvedev has declared five principles of the Russian foreign policy following the recognition of independent South Ossetia and Abkhazia.

"While implementing the Russian foreign policy, I will be guided with five principles," Medvedev told three Russian television channels at his Bocharov RucheI residence in Sochi on Sunday. He had come to Sochi for a number of domestic and international meetings.

First of all, Russia recognizes the supremacy of international legal fundamentals, which define relations between civilized nations, Medvedev said.

"Secondly, the world must be multi-polar. Single polarity is unacceptable," he said. "Russia cannot accept a world order, in which any decisions will be made by a sole nation, even such a serious one as the United States. Such a world order will be unstable and fraught with conflicts."

Thirdly, Russia does not want a confrontation with any country, Medvedev said. "Russia does not want isolation. We will develop as much as possible friendly relations with Europe, the United States and other countries of the world," he said.

The protection of life and dignity of Russian citizens "no matter where they live" is an absolute priority, Medvedev said. "We will also stand up for the interests of our business community abroad. Everyone must know that an aggression will be deterred," he said.

The fifth principle is Russia's interests in friendly regions, Medvedev said. "The same as other countries, Russia has areas of privileged interests. These areas house countries, to which we are linked with friendly ties," he said, adding that he implied not only neighboring countries.

As for the future development of diplomatic relations, Medvedev said, that would depend not only on Russia but also "on our friends, partners and the international community at large." "They have a choice," the president remarked."

God bless mother Russia and protect her from an imminent NUCLEAR attack by the Pentagon....The Pentagon does care about public opinion so they own the media in the United States.... A favorite technique is to stage a provocation and then when the other side attacks *first* claim the moral justification for going to war.

This technique worked brilliantly for them at Pearl Harbor, and that is why they are FEVERESHLY setting up bases in Eastern Europe, the Balkans, Ukraine, Georgia, and Afghanistan etc., etc....They are hoping that Russia will attack the missile bases and thus give them a pretext for initiating a nuclear war.

Nuclear war is the only option left for them because the recent war demonstrated that Pentagon conventional arms are mostly JUNK!!

Russian President Dmitry Medvedev.

Russian flag.

Please pray daily for Russia and these 2 leaders of the FREE WORLD as they face imminent nuclear attack by the Pentagon!!

Russian prime minister Vladimir Putin.

For at least the past 6 years, the [CONFederates](#) at the Pentagon have been supplying Georgia with a vast arsenal of deadly weapons. These include heavy weapons such as tanks, antitank weapons, helicopters, rocket launchers, as well as thousands of small arms like the M16 rifle.

This brutal Roman Catholic crusade against Orthodox Christians was financed by "PROTESTANT" taxpayers in the United States.

In addition, the Georgian army was TRAINED by Pentagon military advisers with the help of soldiers from the fake state of Israel.

Here are just some of the deadly weapons supplied by the Pentagon or their NATO proxies.

Pentagon supplied rocket launchers.

A vast arsenal of weapons was supplied by NATO, [Israel](#), and the Pentagon to Georgia.

Russia demonstrated that these conventional arms are mostly JUNK.

NATO supplied tank.

Georgia launched a sneak attack on the republic of South Ossetia!!

The Pentagon trained the Georgians in the typical [Jesuit](#) dissimulation techniques of talking peace while

preparing for war.

On the morning of August 7, 2008, the Georgians launched a huge surprise attack on the civilians of South Ossetia. They expected to take a spoil and take a prey and have an easy victory in the small province.

South Ossetia is north of Georgia.

South Ossetia is an independent republic in southern Russia.

On August 7, 2008, they were brutally attacked by the Pentagon supplied Georgian army.

South Ossetia.

To lull the south Ossetians to sleep, the attack was timed for the opening ceremonies of the Olympics when the world media would be focused on events in Beijing.

The Georgians were especially brutal toward women and children.

Pentagon conventional arms performed brilliantly against unarmed civilians!!

Tskhinvali—capital of South Ossetia—was completely destroyed.

Most of the capital of South Ossetia was completely destroyed.

International **CONFederate** widow-makers are still at work!!

Family and friends of an Ossetian killed in the fighting in Tskhinvali weep at his funeral.

Almost 2,000 civilians perished along with hundreds of Russian peacekeepers. Reports came in of Georgians actually burning women and children alive!!

Georgian storm troopers were annihilated by the Russian army!!

As we stated, the Pentagon trained and supplied Georgian puppet army was expecting a walkover and easy victory over the surprised South Ossetians.

The Georgians did have an initial victory when they faced no resistance from the civilians . . . but then the Russian army came to the rescue of the South Ossetians and soon the invaders were fleeing southward.

Imagine their consternation when they were defeated and on the run within a few days of the start of the conflict.

Pentagon supplied tanks were demolished.

The Russians demonstrated that Pentagon conventional arms are mostly JUNK as they wiped out their vast arsenal in Georgia.

Totally destroyed Pentagon tanks.

Multiplied millions of dollars of military equipment supplied by U.S. Protestant taxpayers was wiped out by the Russian army.

More Pentagon armor destroyed.

The Georgians were **ROUTED** by the Russian army with the vast Pentagon arsenal destroyed or captured.

Defeated Georgians retreating before advancing Russians.

As expected, the Pentagon owned media HOWLED and cried about Russian aggression and invasion of the small *helpless* country of Georgia. Prime minister Putin was even compared to Adolf Hitler and the invasion compared to the Soviet era invasions of Hungary or Czechoslovakia.
